Group Event Information Sheet

Shooting program for corporate guests & groups

A typical event/evening for corporate groups is conducted as follows:

- Short safety talk (mandatory) & basic instruction
- Guests proceed to 10m range for air pistol shooting. This allows them to practice some of the basics with a gun with minimal recoil.
- Guests move to 25m range for .22 pistol shooting. This is normally fired with .22 revolvers at a distance of 10m to make it easier for inexperienced shooters. Corporate groups have often used this part of the evening to run a competition - either teams or individual.
- Guests then have the option of firing a .38 revolver. More bang & recoil, so not all participants take up this option.

Police requirements

It is a legal requirement that every individual wishing to participate in handgun shooting must provide certain information. This information is:
